Easy to upload, share, and publish. Search for: Serenity Serenity If you want to capture the pose that perfectly conveys the feeling of serenity, the first thing to do is to practice. Try things out until you get it just right. When you're ready, take a break and shut the world out. The best way to do this is to practice posing in a quiet space. Find an empty spot to sit down or lie down and rest for a moment. Stare at a wall and see if you can empty your mind. What images appear? Do you see a sense of peace, or something else entirely? Spend a moment thinking about it and see if your perspective changes. Examine the images you have. Which ones seem to best capture the feeling of serenity? And what aspects do they capture? If you can figure out why you have certain images in particular, you might have a hit on your hands. Here are some thoughts to keep in mind when you're preparing to shoot: The darkness

Field of the Invention The present invention relates to a drive device for a belt-type continuously variable transmission mounted to the transmission case of an automatic transmission. 2. Description of the Related Art A belt-type continuously variable transmission is available as a drive device that is mounted to the transmission case of an automatic transmission or the like (see, for example, Japanese Patent Application Publication No. 2001-324846 (pages 4 to 5, FIG. 6)). The aforementioned belt-type continuously variable transmission includes: a drive pulley that is disposed in the gear train direction so as to be pressed against a flange (radiator) formed on a transmission case; a driven pulley that is disposed in the gear train direction so as to be pressed against an inner periphery of the drive pulley; and a transmission belt wound around the drive pulley and the driven pulley and having a shape being able to be varied to be expanded and contracted. The drive pulley is a pulley that is made of a formed metallic material, and the driven pulley is a pulley that is made of a formed molded material. As a formed metallic material, iron is typically used. As a
