Interoperability AutoCAD supports interoperability with CAD systems like Bentley MicroStation, ProEngineer, Plastics, Nemetschek LISP, and drawings from the earlier releases of AutoCAD. Third-party programs that interoperate with AutoCAD include Architect (C++), Archetype (C++), Repetier-Host (Python), and Repetier-Host-Explorer (Windows). DXF, the official exchange format for AutoCAD drawings, was originally developed by Autodesk as an interchange format for CAD. Other major CAD programs such as MicroStation, S/E and Inventor use the DXF format as well. Output formats AutoCAD can save files in a variety of formats. As of 2016, formats

include: The following table shows the initial and currently supported file format options for each of the basic drawing types, as of AutoCAD 2018 release. AutoCAD can open drawings in other formats if it is specified when saving. The exact formats that can be opened are also specified in the drawing properties dialog box. It is possible to save a drawing to an existing file by using the Save As command. The Save As dialog box lets the user choose the output file format, as well as other options such as file size, print resolution, and drawing transparency. The following table shows the initial and currently supported file format options for each of the basic drawing types, as of AutoCAD 2018 release. AutoCAD 2017 supports saving bitmap (BMP) files and three-dimensional (3D) models to standard heightmap (HMP) format, but not as of AutoCAD 2018. Export AutoCAD exports drawings to AutoCAD files (.DWG), AutoCAD Project files (.DWGPROJ), .RFA files, .RFAs, .PS, .DXF, .DGN, .DGS, and .MIT file formats. The .RFA file format was formerly referred to as the .RIF file format and was the main .RFA file format until 2011. AutoCAD can save drawings to a spreadsheet format. AutoCAD can export 2D and 3D drawings to CSV, Delimited Text, and Encapsulated PostScript (EPS) formats. The user can specify the conversion of colors to grayscale, and the size of each cell in a spreadsheet. AutoCAD ca3bfb1094
